Question3 Design a job searching and posting platform.

Objects:

    User:
        Data:CV
        Actions:Search,SubmitCV

    Website：
        Data:URL
        Actions:Sort

    HR:
        Data:Name,Corporation
        Actions:PostJob,InformDecision,SetRequirement

Sequence of invoking behaviors on Objects:

User Xiaoming,
Website inDeed,
HR hr

if(Xiaoming.needsJob)
    Xiaoming.Search->inDeed,position,site,salary:collection of job
    if(Xiaoming.isSatisfied)
        Xiaoming.SubmitCV
            if(hr.isSatisfied)
                hr.InformDecision:true
            else
                hr.InformDecision:false
            end
    else
        Xiaoming.Search
    end
end
